Cattlemen and Friends,

Welcome to our 25th Annual Bull Sale, it’s hard to believe we have been doing this that long. We were very blessed this past year, and for me, 2013 was a year to reflect, a year to be grateful for everything we have. On June 4th Ashley and Andy had their 4th child and we were blessed with our first granddaughter, Lily May Fisher.

We went into 2013 extremely dry, there was no subsoil moisture of any kind and it started out being one of the driest springs I had ever seen. Ranchers in a big area around us were making some hard decisions about selling cows – and then it started raining and all of a sudden, it turned into the wettest year I think a lot of people had ever seen. Crops turned out good. The hay crop was plentiful and the grass stayed green well into fall.

I am sure everyone has heard stories about the terrible storm in early Oct. that hit southern ND and most of SD. We were a part of that storm but in no comparison to what they had in the center of it all where there was 2-5 inches of rain followed by 3 feet or more of snow and 60-70 mph winds. Our hearts and prayers go out to all the ranchers that lost livestock in this terrible storm. It is hard for us to imagine the loss these families have gone through. I hope that everyone will somehow find a way to rebuild their herds. To do our part to help these families, we have decided to donate the proceeds from the 25th bull to come through the ring to the Rancher Relief Fund.

These are exciting times to be in the cattle business with record high prices and ranchers taking home some of the biggest paychecks of their lifetime. I said the same thing last year but wow has this gotten even better. The cow numbers in this country keep dropping and everything points to feeder cattle prices staying good for quite some time. The Char-cross calves are still in high demand and feeders can’t find enough of them. Now, would be a great time to switch to Charolais bulls or upgrade the ones you already have. Cattle are still sold by the pound and a Charolais bull will put pounds on your calves as fast as any and do it efficiently.

The quality and uniformity of this set of bulls runs deep again this year. We contribute a lot of this to our mother cows. The females are the backbone of our operation and we think you will see that when you look at the bulls. They were weaned on Oct. 17th, given all their shots and poured. They were ultrasounded for the carcass data on Jan. 14th, the same day their final weights were taken. This weight was used to calculate their ADG, WDA and YW through the AICA. In looking through the catalog, you will notice our weaning weights were down from last year. I think two factors contributed to this; first, the grass stayed green and never really hardened up, and second, our calves were still on the cows when the early Oct. storm hit and even though the calves looked good, they seemed to just hold their own the last 2 weeks before weaning. It has also been tougher to get good gains with all the cold weather and fluctuating temperatures we’ve had this winter.

When it comes to raising Charolais seedstock, our philosophy is a balanced trait selection approach – not over or under emphasizing one particular trait. With this approach, we feel our cattle will fit into each phase of the cattle industry from the cow/calf operator, to the feeder, to slaughter. Our #1 goal is customer satisfaction. If for some reason you are not pleased with your bull, let us know and we will try to rectify the situation. We are truly grateful for all the repeat and new customers we have year after year.

The cattle will be at the ranch NE of Reeder until Tues., Feb. 11 and then at Bowman Auction Market until sale day. If you would like to view the bulls before Tues., give us a call.

Plan to join us Fri. Feb. 14th for dinner and the sale. If you have any questions or would like to visit about the bulls, call Ryan 701-853-2870 or Ryan cell 701-928-0788 or Blake 701-206-0272. Thank you for your interest in the bulls, we hope to see you sale day.

Ryan

Calving ease sire we have used on heifers and cows with great results. The calves are moderate-framed, thick, deep, and easy fleshing with super dispositions. Makes outstanding females that are thick, deep, and moderately-framed with good udders and outstanding milking ability. His females are some of the top cows in our herd. His bulls are top-notch. They are easy to look at, easy calving with good scrotals and super dispositions. He is coming 11 years old and has well over 200 progeny listed under his name in the AICA directory in 9 years of data, all sired naturally. Six sons sell. **Semen available. Homozygous polled.**

Sires calves with outstanding depth, growability and superior calving ease, along with disposition and marbling. Also adds tremendous scrotal development to his bull calves. He has been used successfully on first-calf heifers; he also does an outstanding job on cows. His bull calves have been our high-selling sire group the past 3 years. Last year, he had 17 sons that averaged $6,530! He is #12 in the nation on the Multiple Traits Leader list for the AICA. 17 sons sell! **Semen available. Homozygous polled.**

One of the top bulls in Lindskov-Thiels' 2011 production sale. He is the son of the heavily proven Easy Blend. We were impressed by his overall performance numbers in combination with a moderate birth weight and smooth conformation. He also had some top carcass numbers, indexing 160% for IMF. He has done a good job for us in his second year of service and has been used successfully on 1st calf heifers both years. He passes on his tremendous smoothness and calving ease to his offspring, while adding performance, conformation and good disposition. Eleven sons sell!

A home-raised son of HC Hotline 5107. He sires calves that have tremendous calving ease, smooth-muscled cattle with outstanding body length, performance and disposition. We have used him AI on a limited basis the last few years and thought enough of him to buy him back from. We will have a great selection of his sons in our sale. If you liked 5107 sons in the past, be sure to check out 849's progeny. Seven sons sell. **Homozygous polled.**

An out cross bull for our program that we purchased from Raile Charolais in Kansas. He was the high selling bull in their 2009 production sale. He is a sire that adds exceptional thickness, muscle and moderate to his calves. He has excellent feet. His dam is a Dam of Distinction. His daughters are going to be outstanding females. Five sons sell!

A new herd sire we purchased from Eggleston Charolais in SD to use mainly on heifers. He is a son of the very well known EC No Doubt who has been used nationwide in many AI programs on heifers and cows alike. We only managed to get 4 bull calves out of him - they are all in the sale and all out of 1st calf hfrs. We should have a better selection of his progeny in next year’s sale. His calves are deep bodied with lots of hair and good eye-appeal. Four sons sell.

An exciting new herd sire who is a son of EC No Doubt 2022. He will sire cattle with outstanding calving ease, length and disposition. He also adds great eye-appeal and structure to his offspring. We are looking for great things from him in the future! One of the best bulls to sell in the Doll Charolais 2011 sale. Three sons sell. Homozygous polled.

A very eye-appealing son of Cash Flow. Cash Flow is sired by the well known EC No Doubt who has been used by many breeders across the US and other countries. This guy hurt his foot at 2 months of age and it seemed to bother him most of the summer, which hurt his 205 wt. He is a very good bull out of a nice 1st calf heifer.

Here is a long–bodied bull that is sired by one of the top prospects of our 2012 sale, HC Gain & Grade 107. We got 3 bull calves out of 107 and they all made the sale cut. The dam of this bull has been a very good cow for us over the years. She did not raise a calf the year before and in turn, she got a little fat and added a few more pounds to her calf's BW.

A very long-bodied Westport son with good hair and good bone. Dam is a 3-yr-old and full sister to last year’s high selling bull that sold to Jerry Olson of Selby, SD. He has really come on since weaning, gaining 4.26 pounds a day, which ranks him number 3 for ADG. Very good disposition and clean sheathed.

A favorite of mine since birth. Full brother sold in last year’s sale going to Rosenow Ranch for $9,000 and he was the youngest calf in the sale. Their dam made up almost 2 months on calving intervals to make this guy one of the oldest bulls in this year’s sale. She is a super thick made Wy Wind daughter who has done a very good job for us over the years. This guy indexed 111 at weaning and is moderate framed with a very thick topline and a huge hind quarter. EPD’s rank him in the top 7% for WW and top 6% for YW. Selling 2/3 interest and full possession.
"We have exclusively used Honeyman bulls for over a decade and have always bought the bulls with the bigger birth weights. We breed them to medium framed black and baldy cows and have yet to pull a calf for being too large. We feel your diligence in culling for too large of chest measurements coupled with the overall extra length of the bulls is the reason we have had great success using your higher birth weight bulls. The calves are very vigorous at birth and have consistently weighed over 600 lbs. at weaning on the 1st of Nov. while being born after the 1st of April. It’s great to have this type of bulls."

-Ron Slaba, Ludlow, South Dakota

Dam has raised 4 full brothers in a row with an average WW index of 108 and she has now become a Dam of Distinction for the AICA. All 4 brothers have been similar in kind and top performing cattle. This guy indexed 110 at weaning and has gone on to do very well on feed. Only had a 28.5" chest at birth, which is outstanding for a bigger BW bull. He will calve well on cows. EPD rankings: top 4% for WW, top 1% for YW and top 2% for SC.

Here is a top-notch Gold Blend son who has put a lot of things together: calving ease (chest 27" and BW 90#), weaning performance (indexed 107), yearling performance (indexed 106). Dam is a 10-yr-old cow who is a Dam of Distinction and also the mother of HC Intimidator 612, a home grown sire we used in our herd and got some very good females out of. She has been a very productive female that always gives us excellent calving ease along with good performance. She carries a 12.9 calving ease EPD and a -5.1 BW EPD which are both in the top 1% of the breed. This is probably the best calf she has raised since she raised 612 as a 3-yr-old. His EPD rankings: top 12% for CE, top 5% for BW. Also one of the top REA bulls in the sale, ranking number 4 out of 60 bulls.

Here is a long, stretchy, solid muscled bull out of a good 3-yr-old daughter of
5107. He is a good-haired calf with disposition, eye-appeal and good bone. Son of Westport and one of his best. It is calves like this that make us appreciate the chest measurement – he has over a 100# BW but only had a 28” chest at birth – that’s calving ease! The added BW is in the body length.

A good deep-bodied Gain & Grade son whose dam is a top-notch cow in our herd but she didn’t raise a calf the previous year and in turn, gave us a little more BW than usual. This bull will calve well on cows, there is no doubt in my mind – dam has never had a calf over 90# and his sire has been used on heifers. Good EPD package – ranks in the top 15% for WW and top 4% for YW EPD. A standout carcass bull for sure! Ranks number 2 for both REA and IMF- that doesn’t happen very often. He has really performed on feed, coming out with the best gain of all bulls at 4.35 pounds per day.

Full brother to the high selling bull in our 2012 sale that sold to Rosenow Ranch. This guy did not wean off his mother quite as well as his brother did but he has made up a lot of ground since. One of the best gaining bulls in the pen at 3.81 pounds per day. Very eye-appealing, stout bull. He has an extremely attractive EPD line.
Another son of our home raised herd sire 849. Very long-sided and smooth made bull that will give you long, stretchy calves with super calving ease. Another bull with a great disposition and an all-around good carcass bull.

BOW MS HORIZION 611 P  

Another bull out of HC Gain & Grade 107 that sold in our sale 2 years ago. What a calf this guy has turned out to be – first he had an 87# BW with a 28” chest, which will give you outstanding calving ease, he weaned off his 3-year-old Wy Wind dam at 744# adjusted WW to index 110 and then has done well on feed. This guy is a good looking bull with a nice curve bending EPD line to boot. EPD rankings: top 15% for BW, top 10% for WW, top 10% for YW, top 3% for SC.
We were expecting good things when we mated Gain & Grade S036 with this up and coming young female and we were not disappointed. She indexed him at 111% on his adjusted 205 day wt. Check out his EPD line – top 8% for CE, top 8% for BW, top 15% for WW and top 15% for YW. This bull should give the commercial cowman everything he is looking for.

Here is a thick butted, moderate framed twin sired by Gold Blend. Nice looking bull.

This is the third and last bull in the sale out of HC Gain & Grade 107 and look at the numbers he has put together – 84# BW, 28” chest circum., 773# 205 day wt. to index 114, a 3.76 pound per day ADG and a 1375 pound YW. Pretty impressive numbers! Now check out his EPD line: ranks in the top 12% for BW and top 4% for both WW and YW EPD. It is hard to find good herd sires with that low of a BW EPD along with that high of a growth EPD.

A Wy Wind son that should give you longevity. His sire is still here with almost 11 years under his belt. We used him again this past summer, not as hard as usual, but he still did the job.

THANK YOU FOR ATTENDING OUR 25th ANNUAL SALE!!

A Wy Wind son that should give you longevity. His sire is still here with almost 11 years under his belt. We used him again this past summer, not as hard as usual, but he still did the job.

Full brother in blood to Lot 3035 and also to our high selling bull HC Gain & Grade 126 that sold in 2012. This guy is out of a big 5107 first calf hr. He was the #3 ranked bull for WW index out of all the 1st calf hr. He keeps getting better as time goes on. Deep bodied and big framed – has been one of the top gainers at over 4 pounds per day and also has the third heaviest yearling weight at 1419 pounds. Ranks in the top 8% for WW and top 4% for YW EPDs.

This bull should give you longevity, fertility and excellent feet. His dam has been nothing short of remarkable – she will be coming 17 yrs. old with her 16th calf this spring. She has never missed – raised her own calf every year and has not been just an average cow. Her calves’ average weaning index is 102 on 15 calves. She did another good job raising this guy to a 102 weaning index. He also came in with the third biggest ribeye at 16.08.

Good Gold Blend son that was the highest indexing bull in his pasture group at 113. Outstanding calving ease, good length, disposition and added performance all in one eye-appealing package. Full brother indexed 110 last year. This guy was a standout in the pasture this summer.
Another good Gain & Grade sired bull out of a big, deep bodied daughter of the popular Grid Maker. She could be the biggest cow in our herd so it is possible this guy could get to be a pretty good sized animal in a few years. He has some good performance numbers and outstanding performance EPDs to go with it. He ranks in the top 4% for both WW and YW EPDs.

These next two bulls are ¾ brothers and in many ways, very much alike. Both are out of 1st calf heifers that calved on their own. They will give you good calving ease and a stout set of calves in the fall.

One needs to take a good look at these later bulls out of 1st calf heifers. Normally, bulls like these would be the first calves born. We used a new bull on all of our heifers and didn’t realize we had a problem until they started re-cycling, so we had to sort them all out and put them in the pastures with the older herd sires we knew would worked on heifers. The genetics are definitely there, just in a younger package.

The first bull sired by our new herd sire, Morton Y15, who is a son of No Doubt. His dam is a 3-yr-old Wy Wind daughter that raised our second high selling bull last year that sold to Darrel Bergtoll, Saco, MT for $11,000. Excellent calving ease and weaning performance here.

**One of Blake’s bulls and what a bull he is! Look at his numbers – 81# BW, 26.5’’ chest, 792 pound WW with a 111 index, 1376 pound YW with a 103 index and a very appealing EPD line. Then consider what he has physically to offer: long, straight and thick-topped, small head, big scrotal, loads of hair (cream color) and has good depth. To make him even more impressive, he is out of a 1st calf heifer that placed him #1 for WW index against all the 1st calf heifers. EPD rankings: top 12% for BW, top 7% for WW, top 9% for YW and top 8% for SC.**

A good, bigger framed Wy Wind son that has really come on since weaning. Has been one of the top gaining bulls on feed at 3.73 pounds per day. You will like his style and conformation.

A nice looking, thick made U017 son. When you look at his data, there is probably one number that jumps out at you, his BW, but I wouldn't worry too much after looking at his chest measurement of 28.5". There are a lot of 90# calves with bigger chests. Ranks in the top 15% for WW and YW EPD’s.

A very sleek looking young Gain & Grade son who is a ¾ brother to lot 3047. Dam is a very good Intimidator daughter who lost her calf last year and ended up not raising a calf. That, and being born very long, contributed to his 102# BW. I am not sure he isn’t a true calving ease bull. Take a look, see what you think. Clean sheathed.

He also has some nice looking EPD’s: ranks in the top 11% for BW, top 15% for WW, top 10% for YW and top 8% for SC.
Another young bull out of a 1st calf hfr. with the Gold Blend/Gain & Grade cross. Two sires we have had good luck with using on hfrs. This guy was born unassisted and has really come on since weaning. You will like his look. He was the fifth highest marbling bull with a 154 index and the fourth highest gaining bull at well over 4 pounds per day. Pretty impressive for a young calf that has to compete with the big guys for feed every day.

What a powerful good young calf this is. Was the #1 indexing bull in his contemporary group of 24 bulls indexing 119. I think he has the highest 205 day weight of all the bulls and the very best performance EPD’s. Ranks well under the top 1% for WW and YW EPD’s and the top 5% for SC EPD.  If you are looking for a true performance bull that will give you a set of calves that will push the scale down on sale day, don’t miss this one.

Another young bull out of a 1st calf hfr. with the Gold Blend/Gain & Grade cross. Two sires we have had good luck with using on hfrs. He was the fifth highest marbling bull with a 154 index and the fourth highest gaining bull at well over 4 pounds per day. Pretty impressive for a young calf that has to compete with the big guys for feed every day.

What a well put together bull this Morton son is. Outstanding eye-appeal, bone, muscle and structure. Indexed 112 at weaning and since has been nothing short of impressive gaining 4.34 pounds per day and coming in with the best YW at 1450 pounds! Probably the thickest loined, biggest rumped bull in the sale. You would have a hard time picking him out of a set of bulls a month older than him. He is hard to fault. Ranks in the top 5% for both WW and YW EPD’s.

What a powerful good young calf this is. Was the #1 indexing bull in his contemporary group of 24 bulls indexing 119. I think he has the highest 205 day weight of all the bulls and the very best performance EPD’s. Ranks well under the top 1% for WW and YW EPD’s and the top 5% for SC EPD.  If you are looking for a true performance bull that will give you a set of calves that will push the scale down on sale day, don’t miss this one. Super disposition.

Don’t know if we have ever ended the catalog with a bull out of a 1st calf hfr. before but I really like this calf, and his mother is going to be a good one. Take advantage here, he is young but the genes are all there. Super disposition and the number 1 marbling bull in the sale at 4.57 IMF for a whopping ratio of 179%!
If for some reason you are unable to make it to the sale, you can give Ryan or one of the ring men your bid, in the strictest of confidence. Phone bids can also be taken the day of the sale by Ryan or one of the ring men. Please let us know ahead of sale time if you need assistance so we have ample time to prepare. Also, this year we will be broadcasting the sale live on DVAuction. Information on how to register to bid and how to use the website can be found below.

Ryan home: 701.853.2870
Ryan cell: 701.928.0788
Blake cell: 701.206.0272
Bowman Auction Market: 701.523.0600
FEEDING REGIMEN:
The bulls have been fed the same way as they have been for the past 15 years. They are fed a high fiber pellet that is formulated for growing bulls out without getting them fat and fleshy. It is a very safe feed and can actually be fed in self-feeders, although we have never fed that way. Our bulls have always been bucket fed twice a day plus fence line fed all the long grass hay they want - they get absolutely no silage. We feel this way of feeding the bulls is ideal for getting them in the right condition for breeding and still allows them the ability to show how they grow on feed. This will keep good feet under them, and they are more apt to hold their condition.

CHEST MEASUREMENTS:
For many years we have been measuring the chest circumference on all of our calves. They are measured at the same time we take the birth weights. We feel it is as valuable as the birth weight itself in measuring ease of calving. We maintain the thought that a calf with a 100# birth weight and a 28 inch chest will calve just as easily as a calf with an 85# birth weight and a 28 inch chest. In our program every calf with a 30 inch chest or greater is steered.

GUARANTEE:
Bulls are guaranteed breeders through the first breeding season. If a breeding problem has been confirmed by a veterinarian, the buyer must notify the seller and return the bull in good health and in good condition for the guarantee to apply. The buyer will be given a satisfactory replacement, your money back, or credit towards the purchase of another bull in the next sale. In no case will the seller be responsible for more than the purchase price. Honeyman Charolais will make every effort to ensure that you, our customer, are fully satisfied with the bulls purchased.

2/3 INTEREST/FULL POSSESSION:
Buyers of these bulls would own full possession, all salvage value, and control his destiny. We are reserving the option to collect semen from the bull, at some point and time, at the buyers convenience, if we choose. Also, in the case of semen sales, this 1/3 semen interest gives us a continuing business involvement and would also provide extra income to the buyer.

DELIVERY AND FEEDING:
Honeyman Charolais will feed all bulls sold in the sale until April 1, 2014, free of charge. We offer this to our customers for their convenience, and keeping the bulls on the same ration for a longer period of time allows them to keep growing and allows us to get them in the right condition for the breeding season. After April 1, we will deliver the bulls up to 200 miles, free of charge. For delivery later than that, we will charge a minimal fee or work with you on trucking arrangements.
REGISTRATION:

All of the bulls selling are purebred and registered with the AICA. Papers will be transferred to the new owner after delivery of the bulls.

SEmen Testing – Discounts:

For those of you who want us to feed your bulls until Apr. 1, 2014, we will have them semen tested sometime in late March, at our expense, before we deliver them to you.

For those who take your bulls home after the sale, you will be given a $100 discount on the purchase price of that bull, but, if you choose to have them semen tested, that expense will be yours.

Viewing the Bulls:

The bulls may be viewed at the ranch northeast of Reeder until Tuesday the 11th of February, after that they will be at Bowman Auction Market until sale day. If you would like to look at the bulls anytime we would be glad to show them to you or if you have any questions please call Ryan at 701.853.2870 (home) or on sale day you can reach him at 701.928.0788 (cell) or at 701.206.0272 (Blake’s cell).

ALL EPD’s in the catalog are the NEW 2014 EPDs.
